of christmas 2013 management of imagination. Pagination The copyright law of the united states (PCT) requires that any person who wishes to reuse this or any other work of mine must obtain permission from the copyright holder, if they want to reproduce it in any way, although a few excerpts of my writing (including this one) may be quoted without permission on a noncommercial site. My work has appeared in print before, and I don't own the copyrights to the pieces I have written for magazines and journals. Some of the magazine and journal copyrights have expired in the United States and other countries, and the copyright to my other writing is owned by other people. Copyright to my book "The Unknown World" and to its jacket covers has expired in most countries, but not in the United States and Canada.Q: Looking for OS X native CalDAV client A common error in mobile phone users and desktop users alike is the inability to share their calendars from their computer. My

---

Mac is the only computer with any value on the local network (XP is old and unused). Some time ago I found a calendar sharing application called CaliDay that did the job perfectly. It is cross platform, works on Windows and Mac OS X and does what you'd expect it to do: adding/removing users, viewing/editing your calendar, etc. I was wondering if there is a similar application for OS X that doesn't require root access. I am aware of the myriad of alternatives, but I would prefer to avoid installing something I don't want to use. I am looking for a native solution, but I'll happily take any other suggestions. A: Since you're asking for a native app, I think the best option would be Open Cal. It's a free open-source app with source available for Mac OS X and iOS. I've used it for years. It's a bit rough around the edges, but it's free and it does the job. Effects of a high-fiber diet on blood pressure and heart rate. Twenty-two patients who were selected on the basis of having a high average blood pressure (greater than or equal to 120 mm Hg systolic) and a left ventricular wall thickness of greater than or equal to 0.40 cm were randomly assigned to receive either a high-fiber (50 to 60% dry weight; calories, 300 kcal/ 82157476af
